EDUCATION

Purdue University

West Lafayette, IN

Bachelor of Science in Computer and Information Technology

May 2025

- Minor: Design and Innovation
- Certifications: Specialized Machine Learning Course, Google Cybersecurity Certificate

EXPERIENCE

Copado Inc

June 2025 – Present

DevOps Support Engineer

New Orleans, LA - USA

- Spearheaded the design and deployment of Copado's Support Triage System and Omni Channel Routing in Salesforce, modernizing case handling and improving visibility across global teams
- Defined and documented Omni Channel Routing Guidelines outlining presence statuses, assignment logic, and queue prioritization
- Collaborated cross functionally with DevOps and Engineering teams to troubleshoot and enhance post launch Omni Channel performance and AI routing stability, maintaining system health and scalability
- Supported day to day technical case resolution and process optimization across Salesforce, Copado Pipelines, and integrated DevOps toolchains
- Applied design thinking and user research during the internship phase to shape workflow improvements, later owning the end to end support innovation rollout as a full-time engineer

International Data Corporation

June 2024 – Aug 2024

Research Analyst Intern

Dubai - UAE

- Conducted extensive research in cloud computing and Generative AI, resulting in the identification of **12** emerging trends that informed strategic planning and enhanced competitive positioning within the MENA region
- Compiled and presented **2** detailed reports on cloud adoption and GenAI use cases, leading to a **40%** increase in stakeholder engagement during decision-making processes for technology investments
- Analyzed market dynamics affecting over **\$1B** in technology spending across MENA, delivering actionable insights that supported a shift towards hybrid multicloud solutions, improving operational efficiency by **30%**

Digitent

May 2024 – July 2024

Generative AI & Podcast Strategy Intern

New York - USA

- Spearheaded the design of an AI-driven voice replication system for ad creation, resulting in a **30%** reduction in production time and enabling over **500** podcast creators to generate personalized audio ads seamlessly
- Executed a comprehensive categorization framework for podcasts, significantly improving ad targeting precision and achieving a **25%** increase in listener engagement metrics across diverse content genres
- Orchestrated the integration of advanced generative AI features for ad script development, enhancing overall content personalization while increasing creator satisfaction ratings by **40%**

PROJECTS

StocksUp - InnovateHer Hackathon 2025 Winner | *Full-Stack Financial Analysis Platform*

- Developed a real-time stock analysis tool integrating **5** APIs (FMP, MarketStack, ChatGPT, Groq, Auth0), featuring secure authentication, CLI visualization, and AI-powered financial insights for NASDAQ-listed stocks

Digital Booking System | *Full-Stack Development & Cloud Architecture*

- Engineered a scalable convention center booking platform achieving **40%** faster reservations and **99.9%** uptime, leveraging cloud infrastructure to handle **500+** concurrent users

Design Innovation Solution | *Product Development & Research*

- Led development of climbing safety equipment with **5-member** team using CAD and 3D printing, achieving **15%** injury reduction and winning **2nd** place in innovation showcase

EXTRACURRICULARS

InnovateHer (Executive Member, Communications Committee)

Aug 2024 – Present

Purdue University

West Lafayette, IN

- Led outreach initiatives for a 36-hour hackathon, increasing underrepresented group participation by **40%** and achieving **260+** diverse attendees
- Partnered with **5** professors and **10** industry professionals while implementing multi-platform strategies, achieving **75%** participant satisfaction and **50%** increase in engagement reaching **10,000+** tech enthusiasts

TECHNICAL SKILLS

Technical IT Skills: Linux & Unix Administration, Wireshark, Ubuntu, Windows Server, VMWare VSphere and ESXi Hosts, Cloud Infrastructure, Database Management, System Architecture

Programming Languages: Python, Java, SQL, HTML & CSS, C, PHP, Socket Programming

Technologies & Tools: Salesforce, Docker, AWS, PyCharm, Git, IDLE, Raspberry Pi, Adobe Illustrator

Design & Innovation: CAD, 3D Printing, Rapid Prototyping, Product Development, User Research, Design Thinking
